

The set of statistics presents performance of Polish farms providing their data to Farm Accountancy Data Network (FADN). The variables and economic margins used are fully consistent with FADN Standard Results published annually by DG AGRI of the European Commission (EC).

The liaison agency responsible for FADN in Poland i.e. organisation of data collection, data processing, data transfer to EC is IAFE-NRI.

Basic information:

- The FADN field of observation covers commercial holdings. In practice, FADN field of observation covers farms producing at least 90% of Standard Output (SO) value generated by all the farms in a given country. Minimal economic size allowing the farm to be included in the FADN field of observation in Poland equals to 4 000 euro SO.
- Polish FADN farms sample is representative according to three grouping criteria: FADN region, economic size and type of farming. Currently, more than 11 thousand farms deliver data for the Polish FADN survey.
- Common Typology of Agricultural Holdings is a classification of farms by economic size and type of farming in FADN regions allowing benchmarking. Type of farming is determined by the share of SO value coming from particular farm activities in the total value of farm SO. Economic size constitutes a sum of SO values coming from all farm activities expressed in euro.

Structure of farms in the Polish FADN field of observation

Basic indicators characterising field of observation as part of the general population	M.U.	General population	Field of observation	Share of field of observation in the general population in %
Standard Output	mln euro	18 853	17 539	93,0%
Utilised agricultural area	thous. ha	14 447	12 291	85,1%
Number of LU	LU	10 377 506	10 055 995	96,9%
Number of AWU	AWU	2 811 622	1 868 527	66,5%
Number of farms	No.	1 506 620	730 879	48,5%

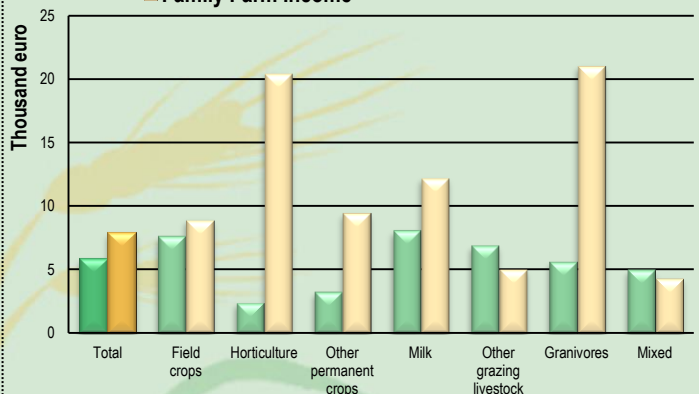

Standard Results by type of production representative for the Polish FADN field of observation (average per farm)

Family Farm Income per family working unit^N in relation and average net salary in national economy [—]

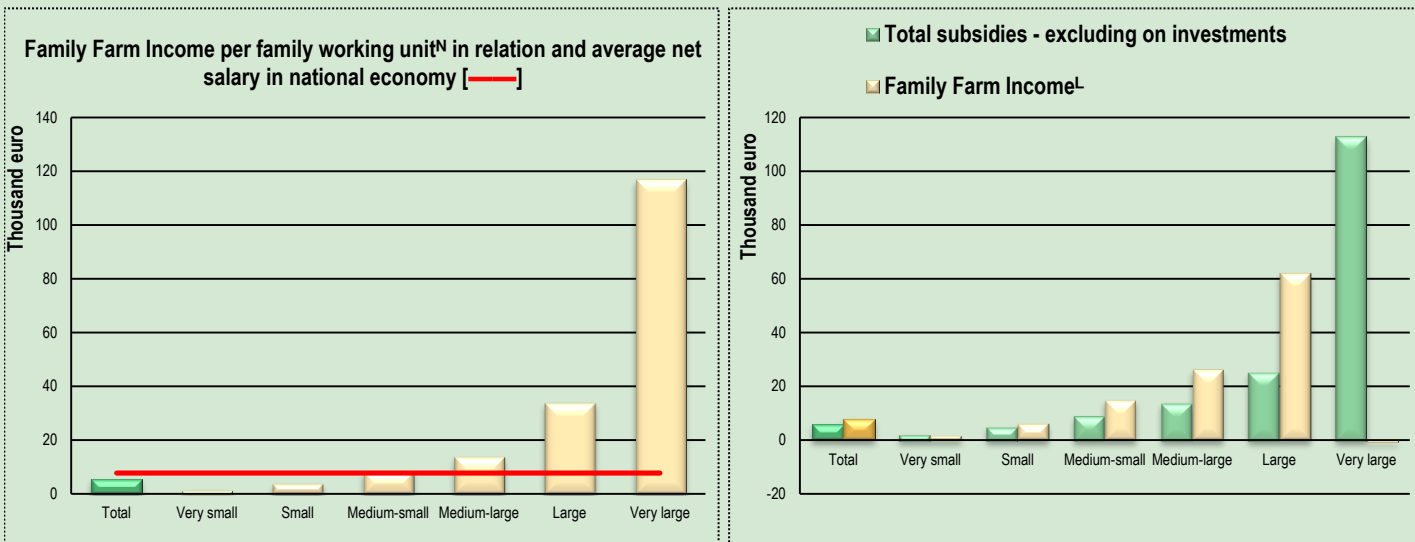

Total subsidies - excluding on investments

Family Farm Income^L

Family Farm Income per family working unit^N in relation and average net salary in national economy [—]

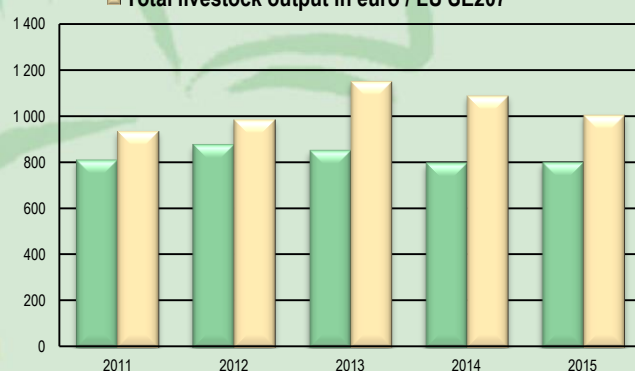

Total subsidies - excluding on investments
Family Farm Income^L

Costs of producing of 100 euro of output

Total crop output in euro / ha SE136
Total livestock output in euro / LU SE207

Selected definitions:

^j Total output	SE131	euro	Total output of crops and crop products, livestock and livestock products and of other output. Sales and use of (crop and livestock) products and livestock + change in stock of products + change in valuation of livestock – purchases of livestock + various non-exceptional products.
^k Total inputs	SE270	euro	Total inputs are the sum of specific costs, overheads, depreciation and external factors. Costs linked to the agricultural activity of the holder and relating to the output of the accounting year. Included are amounts relating to inputs produced on the holding (farm use) = seeds and seedlings and feed for grazing livestock and granivores. When calculating FADN standard results, farm taxes and other dues are not included in the total for costs but are taken into account in the balance "Subsidies and taxes" on current and non-current operations.
^l Family Farm Income	SE420	euro	Remuneration to fixed factors of production of the family i.e. work, land and capital (in case of legal entity farms only land and capital) and remuneration to the entrepreneur's risks (loss/profit) in the accounting year. It equals to FNVA – total external factors + balance subsidies and taxes on investments.
^m Unpaid labour input	SE015	euro	Refers generally to family labour expressed in Family Work Units (FWU = Family AWU).
ⁿ Family Farm Income / FWU	SE430	euro/FWU	FFI expressed per family work unit (FWU = Family AWU) was calculated only for farms where inputs of family work occurred (SE015>0). [SE420/SE015]
